

Start seeing the world again.

PROSE® is a medical treatment developed by BostonSight, experts in the treatment of diseased and damaged corneas and dry eyes. PROSE is life-changing. If you have critical and devastating eye issues, PROSE provides hope. It is often the only treatment that can bring relief from the suffering associated with complex corneal disease, injury, exposure, or damage.

### PROSE Treatment

PROSE treatment combines the expertise of a PROSE Fellow optometrist, medical specialists, and PROSE devices, which are highly advanced scleral device technology. PROSE devices can be customized beyond what is available in commercial scleral lenses. The devices are transparent domes, about the size of a nickel, and made of gas permeable plastic that allows oxygen to reach the ocular surface.

PROSE devices fit under your eyelid and rest on the sclera (the white tissue of the eye), vaulting the damaged cornea and creating a new smooth surface that protects the eye from the environment and blink trauma. The removable devices are filled with saline at the time of application, creating a fluid reservoir that bathes the eye in oxygenated artificial tears.

### QUALITY OF LIFE

of survey respondents reported improved quality of life with PROSE

2024 Survey of 2,000 PROSE Patients

*"I went from being scared to drive at night and not being able to see anything well, even with glasses, to near perfect vision again with PROSE. The first time my lens went in, it was like seeing the world in high definition. I wear mine as much as possible because it is so dramatic a change when I am not wearing them." - PROSE Patient with Keratoconus*

## PROSE Providers

PROSE Fellows are uniquely trained optometrists who are proficient in the fitting of specialty lenses and the treatment of ocular surface disease. The PROSE Clinical Fellowship curriculum, delivered by BostonSight doctors, builds off of their expertise to educate them in all aspects of PROSE treatment and compassionate, patient-centered care. PROSE Fellows work with ophthalmologists, corneal specialists, and other medical specialists to provide you optimal care throughout the treatment process.

## Accessing PROSE Treatment

PROSE is available at leading eye health institutions around the world and is delivered by a network of highly skilled PROSE Providers who have successfully completed a PROSE Fellowship.
